

# 20 EDUCATIONAL RESOURCES FOR KIDS

Young children can only learn language through interacting with parents and caregivers who talk, read, and sing to them. **There is no substitute for YOU! You are your child's first and most important teacher.**

We put together a resource guide for parents and caregivers to access free learning activities for their children and students. The resource guide includes a variety of subjects and areas of focus with links to each resource. We want to provide students with alternate methods to retain their knowledge during their time off from school. Don't forget to take some time away from electronics for your family and be sure to **Read Aloud** for at least 15 minutes every day.
